PowerProducts™

IN-VEHICLE CHARGERS FROM POWER PRODUCTS

A charging solution for any mobile application.

Ideal for fire, emergency, and utility service vehicles, or any installation that needs a proven in-vehicle charging solution.

ENDURA™

Endura chargers are highly reliable and a top choice among communications and public safety professionals. All models charge Li-Ion, LiPo, NiMH, or NiCd batteries based on pod selected and can be powered from a 12V or 24V source. Advanced charging technology prevents overcharging, while providing automatic recharging when a radio remains powered on.

KEY FEATURES

- Radio may stay powered on while charging.
- Utilizes replaceable pods allowing the charger to be updated for future use and with multiple radio models or brands. (Visit *www.powerproducts.com* for over 100 available pods.)
- Available for most radio brands including Motorola, Kenwood, Harris, Hytera, Icom, Maxon, BK Technologies, Tait, Vertex Standard and others.
- Compact designs require less vehicle space than other two-way radio chargers.
- Provides cold and hot battery monitoring and other important battery warnings.
- Certified to meet U.S. Department of Energy and California Energy Commission requirements for energy conversation.
